

SECURITY AWARENESS TRAINING.

HELPING YOU STRENGTHEN THE WEAKEST LINK IN YOUR SECURITY CHAIN

According to CompTIA's recent Trends in Information Security study, human error accounts for around **52%** of security and data breaches.

The reality is that all organisations employ information and cyber security specialists. However, their role is to continually understand and research potential threats to an organisation and then implement appropriate defences, through a combination of policies, processes and technology. It's more difficult to control human behaviour and mitigate error. It is difficult to define because error comes in many forms. Typically, it involves situations in which certain actions, decisions or behaviours threaten business security and can seriously threaten the security of your sensitive data.

To mitigate against this threat, Reliance acsn has a comprehensive Security Awareness programme that enables you to prioritise training activities and course content, provides bite-sized, on-line training modules which are no more than 15 minutes long and supports you with a continuous engagement programme to maximise uptake.

"It takes 20 years to build a reputation and five minutes to ruin it. If you think about that, you'll do things differently."

Warren Buffett

To ensure you get immediate value from your security awareness programme, we conduct an initial 3-day assessment to understand and help you build a prioritised training programme with modules that will help make an immediate impact in building strong security awareness.

Design a relevant security awareness programme

To ensure your people engage with the programme, we utilise the skills of formally trained teachers to design an engaging and relevant programme and ensure you get incremental and ongoing benefit.

Implement appropriate training modules

Training modules will be rolled out automatically on a monthly basis in-line with the bespoke roadmap produced from the

baseline assessment. These modules could include: good passwords, email etiquette, virus vigilance, phishing fears, identity theft, social media, GDPR etc. A full list of modules can be provided on request.

Manage ongoing engagement

To ensure full engagement, Reliance acsn will support the e-learning platform with a range of resources in different styles and mediums designed to ensure that all staff engage with the awareness programme.

Engaging Senior Leadership

As an optional extra, Reliance acsn can provide an engaging and informative classroom security awareness training course for your Senior Leadership Team and Executives. Using a combination of classroom teaching and interactive demonstrations, we can help highlight the importance of security awareness training as part of an effective security program. Buy-in from the top is a key ingredient for an effective security awareness program.

ABOUT RELIANCE ACSN:

We are a Digital and Cybersecurity Service provider and we believe results come from a well-executed and business-integrated approach stemming from the application of our skills and expertise, combined with threat intelligence and effective risk management.

ACSN was founded in 2003. Reliance acsn was born through merger with Reliance Cyber Science in 2016.

We have a highly skilled and experienced team, with an ambitious plan underway to grow significantly in the near future.

We've built strong partnerships with over 80 customers across 5 continents, helping them to address Digital Transformation and Cybersecurity challenges.

Our staff are accredited by all the major security vendors and are able to support virtually any technology you have in place or you've been planning to procure.
